PROFESSIONAL SUMMARY

DevOps and Cloud Engineer with experience designing and managing production infrastructure, CI/CD pipelines, containerized deployments, and cloud architectures. Experienced with Azure, Terraform, Docker, Jenkins, GitHub Actions, Linux, and Nginx, with a strong software engineering background in Laravel, PHP, JavaScript, and Nuxt. Proven experience leading development teams, making architecture decisions, managing production incidents, and delivering applications across North Africa. Comfortable working directly with clients and enterprise partners on technical integrations and deployments.

PROFESSIONAL EXPERIENCE

FREEOUI

2025 – Present

Tech Lead

Tunisia

- Lead a 5-person development team while overseeing the technical direction and production infrastructure of the platform.
- Designed and implemented the complete deployment pipeline and production delivery workflow.
- Architected and developed the platform's entire Laravel backend.
- Own technical architecture decisions across application development, deployment, security, and monitoring.
- Manage production incidents and outages, ensuring rapid diagnosis and resolution to maintain service availability.
- Lead technical integrations and collaborations with major Tunisian partners, including Kashy, BIAT, MyTT, and Up Tunisie.
- Communicate directly with enterprise clients and partners to define and deliver technical integrations and solutions.

BAYER

2024 – Present

External DevSecOps Engineer – CultiBayer North Africa

Remote / North Africa

- Manage the end-to-end deployment and infrastructure lifecycle of a production application deployed across North Africa.
- Design and maintain Azure cloud infrastructure using Terraform and Infrastructure as Code practices.
- Built and manage automated CI/CD pipelines and the complete application deployment workflow.

NEXT CONSULT

2023 – 2024

Developer → Development Team Lead / DevOps Lead

Tunisia

- Progressed from software developer to leading a 5-person development team and taking ownership of the company's DevOps operations.
- Managed 4 VPS servers supporting 4 production applications.
- Designed and implemented automated CI/CD pipelines using Docker and Jenkins for Next.js, Nuxt, and Laravel applications.
- Administered Linux servers and production environments, including Nginx configuration and deployment management.
- Managed production databases and supported application infrastructure and monitoring.
